

Migration Barrier Table: Arroyo Quemado, Arroyo Hondo, Molino and San Onofre Watersheds

**BARRIER ID**

Primary Stream	Primary Tributary	Secondary Tributary	Tertiary Tributary	Physical Description of Barrier Location
----------------	-------------------	---------------------	--------------------	--

Ownership / Interest	Barrier Type	Severity
----------------------	--------------	----------

Stream Miles from Ocean to Downstream End	Stream Miles from Ocean to Upstream End	Total Length of Structure (miles)
---	---	-----------------------------------

Stream Miles to Natural Upstream Limits	Stream Miles to Next Known 1.0 Severity Barrier	Total Habitat Score to Natural Upstream Limits
---	---	--

Migration Barrier Priority Ranking
------------------------------------

**Arroyo Quemado**

**Physical Description of Barrier Location:**

- GPS used to input some barrier locations into the GIS Database (available from CCP).
- Barrier location elevations are based on contour line and stream intersections locations derived in the field and using USGS topographical 7.5 minute quad maps.
- Barriers located using GPS were assigned approximate elevations using USGS 30-meter Digital Elevation Models. Approximate (~) elevations are given in feet (').
- Approximate (~) elevations are given in feet (').
- The lower number and sign(#) refer to most downstream structure with a similar name.
- For example, "#1 Highway 150 Bridge" refers to the first, or most downstream, of the Highway 150 Bridges encountered by upstream migrating steelhead.
- u/s= upstream -d/s= downstream -Ck.= Creek -Conf.= Confluence

**Migration Barrier Priority Ranking:**

- u=unknown
- n=natural
